Taps, Showers  
& Accessories

---

2021

Welcome to Vitra.  
With our extensive range  
of bathroom solutions,  
we have a style to suit  
everyone.

This brochure is dedicated to taps,  
showers and accessories - helping you to  
find your perfect finishing touches.

We also produce sanitaryware and  
furniture to fulfil your complete bathroom  
needs.

The perfect  
finishing touch to  
your bathroom.

# Contents

Turning an essential, everyday experience into something beautiful, relaxing and life-enriching.

If you're looking for complete coordination in your bathroom, view our ranges section. Each of our ranges offer their own unique style of matching taps, showers and accessories.

If you're simply looking to update your shower, see the showers section. Or, if you want to give your bathroom a quick facelift with some new bathroom essentials, see our accessories section.

For key product features, including water-saving capabilities, view the product guidance section.

## VitrA ethos

Our VitrA approach is to create beautiful, inspiring bathroom environments that change our collective perception of the bathroom from that of a purely functional space to something relaxing and life-enriching.

At the heart of this lies the Innovation Centre; a creative hub for really ambitious, forward-looking designers and engineers. We foster an environment specifically designed to facilitate the meeting of conceptual ideas through design, research and technology.

Led by Design Director, Erdem Akan, our team of architects and designers are encouraged to free their imaginations; their inventive ideas showcased in a setting that blends culture, art and lifestyle. With our team's superior designs, VitrA products have been recognised by some of the world's most prestigious design awards.

We excel in all we do,  
pushing the boundaries  
of the bathroom space  
through innovative design.

VitrA products are designed and built to the highest standards. As a result, we can proudly offer customers a 10 year warranty on all VitrA brassware (2 years on VitrA infrared brassware) and a 5 year warranty on all showers and accessories.

**10** YEAR VITRA  
WARRANTY  
BRASSWARE

**5** YEAR VITRA  
WARRANTY  
SHOWERS &  
ACCESSORIES

Our brassware blends design and style to provide improved comfort, sustainability and bathroom aesthetics.

Design for All is one of our core design principles that ensures our products are suitable and accessible for everyone.

Erdem Akan, Vitra Design Director

We are always working to transform the traditional concept of the bathroom.

Our award-winning products are transforming the traditional concept of the bathroom through our commitment to innovation. Vitra are at the forefront of the next development in bathroom design and technology.

## VitrA Blue Life

Blue Life is the production approach, design, attitude and management outlook of all Eczacıbaşı Building Products Division brands, including VitrA.

We are committed to reducing the use of non-renewable resources in the production process.

## The adjustable pins in our brassware can limit the amount of water released by 60%.

Our manufacturing plants are equipped with specifically designed recycling systems to reduce raw material and energy consumption.

In 2017, we implemented new technology designed to recover and re-use water, and today Vitra uses 35% less of this scarce resource.

Temperatures of the ceramic kilns in the Vitra factory were also lowered, reducing energy consumption by 15%.

The same responsibility for natural resource conservation guides the group in the development of products for both residential and public use.

By choosing a Vitra product, you are contributing to saving the world's natural resources.

For example, the 2.5/4 litre WC pan has been certified by the German LGA Institute and reduces water use by up to 60% compared to the single flush.

We also manufacture brassware with adjustable pins which can be set to limit the amount of water released, creating savings of up to 60%.

## Vitra's pledge to the future.

---

- Blue Life means reducing the use of non-renewable resources in the production process.
- Blue Life means making significant investments towards boosting eco-efficiency.
- Blue Life means developing products that promote power and resource conservation at the end-user level driven by a concern for the environment and for our collective future.
- Vitra believe managing the future requires efficient management of our resources today; good design also means taking responsibility for resource conservation.

## Design engineering

Vitra products are handmade by our skilled artisans at our purpose built brassware factory.

From conception through to production, our engineers are dedicated to realising a level of perfection.

Our trained product engineering artisans work closely with our design team to manufacture innovative products that capture the needs of the Vitra customer. Each member of this skilled workforce has an expert understanding of how bathrooms function.

All Vitra products are manufactured from materials that result in their longevity. The main body of all Vitra taps are of solid brass construction. This embodies our ethos to be the best in taps, showers and accessories for the modern day bathroom.

“  
It’s pure artistry  
when our  
designs are  
crafted into  
something  
tangible and  
beautiful.”

Erdem Akan, Vitra Design Director

# AquaSee

Our infra-red mixers are completely touch-free, turning on and off automatically with a wave of the hand. Not only does this offer a much more hygienic solution, it also reduces water waste. If the sensor becomes obstructed, the water will automatically stop after 60 seconds. Our AquaSee products include a subtle side handle to set your preferred water temperature and come with a 2 year warranty.

# Showers

## Showers

Refresh and revitalise your bathroom with our range of stylish showers.

We offer thermostatic and manual options with a wide range of designs, from traditional to contemporary.

- 70 Choosing your Shower System
- 75 V-Box Built-in Shower Mixers
- 77 Minibox Built-in Shower Mixers
- 80 Aquaheat Built-in Shower Mixers
- 81 Flow Diverters
- 82 Wall-mounted Shower Mixers
- 84 Showerheads and Connection Pipes
- 86 Hand Showers
- 88 Shower Columns
- 89 Bath Spouts and Fillers
- 90 Aquaheat Shower Kits
- 92 Complete Shower Solutions

## Choosing your shower system

Choosing the perfect shower that fits with your bathroom aesthetic, matches your personal showering needs and works with your technical requirements can be difficult, so we've broken it down for you.

### Step 1.

Decide between a built-in or wall-mounted shower mixer, depending on the type of wall you have (cavity or solid).

#### Cavity wall

For a cavity wall you can choose either a built-in shower mixer or a wall-mounted shower mixer.

Built-in shower mixers create a contemporary, minimalist look and they open up more space under the showerhead. They can also be positioned in more unconventional areas of the bathroom, such as on the side of the shower opposite the showerhead.

Built-in shower mixers must be used with a concealed shower valve, either V-Box (page 75), Minibox (page 77) or Aquaheat (page 80).

#### Solid wall

For a solid wall, the common solution is a wall-mounted shower mixer for versatility, ease of fit and range of different styles. It is possible to fit a built-in shower mixer into a solid wall, but this involves cutting into the wall to create space for the built-in shower valve.

See page 82 for our wall-mounted shower mixer options.

## Choosing your shower system

### Step 2.

Choose your showerhead and/or hand shower.

We have a wide range of stylish and practical showerheads and hand showers to match our bath, shower and basin mixers. From traditional to modern, round to square, powerful to water-saving, you can find one that perfectly matches the other elements of your bathroom design.

See pages 84-89 for our showerhead and hand shower options.

### Step 3.

Adding a bath to your bathroom equation?

You'll need a diverter to enable the flow of water to be switched from one outlet to another, such as the showerhead to the bath. Our range of diverters come in styles and finishes that match our mixers to give you a complete look. These are shown on page 81.

### Complete shower solutions

We've also created five complete shower solutions which include every element of the shower environment to make it as quick and easy as possible for you to install your perfect shower (see pages 92-93).

## Choosing your shower system

### Shower sprays

From kick-starting your day to winding down at its end, we've got the perfect shower experience to match your mood. Below are a number of different spray options, from soft and gentle to strong and energising.

Aqua-soft

Aqua-massage

Aqua-massage + Aqua-soft

Aqua-spray

Aqua-massage + Aqua-spray

Waterfall

AirDrop

(Mixes air into the water flow to provide a more powerful spray whilst reducing water consumption)

### Type of shower mixer

The mixer controls the flow of water, similar to the tap on a basin.

#### Manual shower mixers

Our manual showers allow you to adjust both the temperature and flow rate, creating a high level of temperature control through the valve.

#### Thermostatic shower mixers

Our thermostatic showers allow you to enjoy a shower at the precise temperature you want, whilst ensuring it is sustained throughout your shower. Carefully mixing the hot and cold water supply, the thermostatic mixer recognises changes to water pressure or temperature, so if a tap is used, a bath run or toilet flushed elsewhere in your home, your shower will remain at your chosen temperature.

Things to consider:

- Perfect for busy households, the consistency in temperature prevents the risk of sudden and unsafe water temperature changes
- Water and energy consumption is reduced with the sustained temperature, lowering your bills
- You can find the exact water temperature that gives you the most relaxing and enjoyable shower experience, and return to this temperature every time you shower
- With our 38° safety buttons, the water will never exceed this temperature unless the button is pressed – ideal for those with young children.

Our thermostatic showers are marked with this symbol.

### Suit built-in thermostatic shower mixer (1 way)

A42675 £134

H: 170 | P: 82

To be used with V-Box

V-Box offers complete flexibility to fit any bathroom design. It enables 3 water outlets (bath, hand shower and/or showerhead) and can be used with a range of square or round built-in mixers. For 3-way showers (bath spout, hand shower and showerhead), select a 1-way thermostatic shower mixer and 3-way diverter - see page 81 for our diverters. V-Box can be trimmed to fit a 77mm wall depth which is standard in the UK and is compatible with our thermostatic shower mixers.

## Aquaheat shower kits

Easy  
Clean

Constant  
Temperature

Easy  
Installation

Extendable  
Column

Our Aquaheat shower kits come with a thermostatic shower mixer, a showerhead and a hand shower. They also incorporate a water-saving button which ensures the flow of water is controlled in a way that prevents unnecessary water consumption, as well as a Cool Touch feature to prevent scalding.

**Aquaheat Joy 200**  
thermostatic shower column

A47200      £320

H: 802 min + 590 extension  
P: 515

Showerhead provides max. 14 L/min. flow rate

Cool Touch

**Aquaheat Bliss 250**  
thermostatic shower column

A47201      £340

H: 792 min + 480 extension  
P: 530

Showerhead provides max. 10 L/min. flow rate

Cool Touch

**Aquaheat Bliss S 230**  
thermostatic shower column

A47202      £365

H: 793 min + 520 extension  
P: 507

Showerhead provides max. 10 L/min. flow rate

Cool Touch

**Aquacontrol Charm 240**  
thermostatic shower column

A47203      £460

H: 772 min + 500 extension  
P: 491

Showerhead provides max. 10 L/min. flow rate

## Aquaheat shower kits

Cool Touch

**Aquacontrol Charm S 360**  
thermostatic shower column

A47204      £750

H: 1140 | P: 548

Showerhead provides max. 14 L/min. flow rate

## Complete thermostatic shower solutions

To help you find the right look for your bathroom we've created five complete shower solutions. Each one brings together every working element needed to bring you a beautiful showering environment in one convenient package.

### Suit complete shower system

A49276 £580

#### Includes:

Wall-mounted long connection pipe  
Lite showerhead  
Style X hand shower with slide rail  
Hand shower outlet for shower kit  
Suit U built-in thermostatic shower mixer  
V-Box concealed shower valve  
Recommended min pressure: 1.0 bar

### Suit complete shower system

A49277 £494

#### Includes:

Wall-mounted long connection pipe  
Rain L showerhead  
Samba hand shower with slide rail (3F)  
Hand shower outlet for shower kit  
Suit U built-in thermostatic shower mixer  
V-Box concealed shower valve  
Recommended min pressure: 1.0 bar

# Complete thermostatic shower solutions

**Origin complete shower system**

A49275      £761

- Includes:**
- Wall-mounted long connection pipe
  - Rain showerhead
  - Origin hand shower
  - Hand shower outlet for shower kit
  - Origin built-in thermostatic shower mixer
  - V-Box concealed shower valve
  - Recommended min pressure: 1.0 bar

**Origin complete shower system**

A4927536      £1,099

- Includes:**
- Wall-mounted long connection pipe
  - Rain showerhead
  - Origin hand shower
  - Hand shower outlet for shower kit
  - Origin built-in thermostatic shower mixer
  - V-Box concealed shower valve
  - Recommended min pressure: 1.0 bar

**Suit complete shower system**

A49278      £336

- Includes:**
- Wall-mounted long connection pipe
  - Rain Q showerhead
  - Suit U built-in thermostatic shower mixer
  - V-Box concealed shower valve
  - Recommended min pressure: 1.0 bar

# Accessories

## Accessories

Our large selection of accessories fully complement our brassware ranges, or can be used independently to suit your bathroom design.

96	Origin
98	Diagon

A44081    £25

**Toilet roll holder**  
A44272    £33

**Toilet brush holder**  
A44287    £73

## Product guidance

## Manufacturing and Testing

**Over our 40 year brassware manufacturing history, we've built an unrivalled reputation for producing beautiful products that deliver on form and function. We now produce 3 million pieces of brassware and 2.5 million accessories a year.**

From conception through to production, our engineers are dedicated to realising a level of perfection. All Vitra products are manufactured from materials that result in their longevity. As a result, we're proud to be able to offer our customers lengthy warranty periods.

Our bathroom taps are made of high quality brass. Not only does this result in highly durable products, but also significantly low lead content.

If you have a manufacturing fault with one of our brassware products within 10 years, we will replace the working parts for free.

Our showers and accessories have a guarantee of 5 years, with our Move Shower Systems guaranteed for 2 years.

We vigorously test all of our products, above and beyond the minimum standards of testing.

1. Our brassware cartridges are tested nearly **2 million times** more than European standard
2. We test against brassware corrosion for **720 hours**, compared to the average of 200 hours, to ensure all of our taps keep their shine
3. Our shower hoses are tested for strength by tying on 1.8 kg of weight and bending it **10,000 times**
4. Our durability testing is **10 times more** than the average, applying **50 bar water pressure** instead of just 5 bar, to ensure they won't leak even after years of use

### Striking finishes

Our range of coloured finishes are created through Physical Vapor Deposition, a state-of-the-art manufacturing process in which metal powders are vaporised and deposited onto the surface. This results in a striking look which remains corrosion and scratch resistant.

Vitra products are designed and built to the highest standards. As a result, we can proudly offer customers a 10 year warranty on all Vitra brassware (2 years on Vitra infra-red brassware) and a 5 year warranty on all showers and accessories.

BRASSWARE

SHOWERS &  
ACCESSORIES

## Evolution of the Vitra brand

# 1942

Dr. Nejat Eczacıbaşı establishes a pharmaceutical laboratory in Istanbul. His first product is a vitamin capsule.

Dr. Nejat Eczacıbaşı

# 1958

The Eczacıbaşı Group opens Turkey's first production plant for ceramic sanitaryware

# 1968

The Vitra brand is created

# 1977

The Eczacıbaşı Group's first ceramic factory in Bozüyük begins production

# 1979

The group opens its first brassware plant within its Bozüyük complex

# Evolution of the Vitra brand

## 1992

Vitra opens its first sales and marketing offices outside of Turkey - Vitra Bad (Germany) and Vitra UK

## 1996

With the new facility in Bozüyük, Vitra has one of the world's largest ceramic sanitaryware production facilities

## 2011

All R&D teams are housed under one roof with the opening of the Vitra Innovation Centre at Bozüyük

## 2014

Vitra wins 2 Red Dot and 2 iF Product Design Awards

## 2019

The Bozüyük complex is expanded with an additional sanitaryware production line, raising capacity to 5.6 million units per year

## 2020

Vitra opens its flagship showroom in Clerkenwell, London

## Today

Vitra is an international brand exporting to 75 countries worldwide

## Sustainability & accreditations

### The European Water Label

The European Water Label is a government initiative put in place to empower consumers with important information on the water and energy use of bathroom products.

With sustainability at our core, the vast majority of our products fall under the top water consumption band (Class A, using 5 litres or less of water).

### WRAS

WRAS (Water Regulations Advisory Scheme) have been approved as compliant with the Water Supply (Water Fittings) Regulations and Scottish Byelaws. All WRAS approved products undergo rigorous mechanical and water quality testing that ensures the product will keep water supply clean and free from contamination.

To see the full list of our WRAS approved products, please visit [vitra.co.uk/about-us/sustainability](http://vitra.co.uk/about-us/sustainability)

### Water pressures

Water pressure, measured in bars, describes the strength of water flow through a pipe. When choosing your bathroom brassware, it's important to understand the water pressure in your water plumbing system. Whether it's a gravity, combination boiler, pump assisted or mains high pressure (ask your installer if you're unsure), identifying your system is key to finding a product that will give the best possible performance.

The minimum water pressure requirements for each product (low, medium or high) are marked in the brochure. Most products will suit any water system, however the high pressure products are designed to work with high pressure systems for maximum pressure. Equally, if you have low water pressure, there are lots of products that will work for you.

LP Low (up to 0.4 bar)

MP Medium (0.4 - 1.0 bar)

HP High (above 1.0 bar)

### Sustainability

We're driven by our commitment to a sustainable future and the efficient use of water is one of our top priorities.

We are also devoted to developing products and technologies that enable our customers to save water in their own home.

From aerators to eco-friendly cartridges, our innovative water-saving features mean you can save water while not compromising on design.

### Aerators

Aerators sit at the end of taps and add streams of air into the water flow. Water-saving and energy-saving, aerators significantly reduce the amount of water used while maintaining high water pressure. By directing water into one single downward flow, aerators also create a smoother flow and reduce splashing. Our ranges with aerators are marked throughout with the following symbols.

Water-saving aerator

Swivel aerator

Coin-slot aerator

Our water-saving aerators use significantly less water while maintaining a strong flow of 5 litres per minute.

Our swivel aerators allow you to easily change the direction of the water flow, meaning you can reach all areas of the washbasin.

Our coin-slot aerators can be effortlessly removed with the use of a coin, making it easy to clean the threaded aerator.

## Sustainability & accreditations

### Adjustable cartridges

Some of our mixers come with adjustable cartridges that limit the maximum heat and flow from the tap, which in turn can save up to 60% waste. Our water and energy saving products are marked throughout with these symbols.

Water saving

Energy saving

### Temperature adjustment

1. Remove the circular cap.
2. Use an Allen key to remove the lever.
3. Unscrew the dome cap and take out the removable ring.
4. Rotate the ring and place back over the cartridge.

The ring restricts how far the lever can be turned left or right, restricting the minimum and maximum temperature. By rotating the ring to the right you will limit the min. and max. temperature. By rotating the ring to the left you will increase the min. and max. temperature.

To reassemble, replace the dome cap, tighten using the Allen key and replace the circular cap.

### Flow Rate adjustment

1. Remove the circular cap.
2. Use an Allen key to remove the lever.
3. Unscrew the dome cap and take out the removable ring.

Use a screwdriver to adjust the screw on the side of the upright post. Turning the screw anti-clockwise will increase the water flow. Turning the screw clockwise will decrease the water flow (4).

To reassemble, replace the dome cap, tighten using the Allen key and replace the circular cap.
